Manvirender Rawat

Fractional Head of Data Analytics & AI for Startups | Founder, Klaymatrix Data Labs | AI Strategy & Data Analytics Leader
Mumbai, Maharashtra, India

Summary

18 years. 10,000+ professionals trained. Clients across Finance, HR, Healthcare, Telecom and Manufacturing.And the same problem shows up everywhere:Data exists. Trust in that data doesn't.Departments pull different numbers. Reports take days to compile. Leadership makes decisions on gut feel — because no one can agree on what the dashboard is actually saying.That's not a tools problem. It's a data architecture problem.——I work with mid-sized companies as a Fractional Head of Data Analytics — stepping in as a senior data leader, without the overhead of a full-time executive hire.What that looks like in practice:→ Auditing your current data stack and killing cloud cost leakages→ Building a single source of truth your entire org actually believes→ Migrating fragile Excel dependencies into structured, automated BI→ Mentoring your junior data team to ship business-impact work, not just chartsI've done this across organizations ranging from 30-person startups to large enterprise teams — and have trained 10,000+ professionals through structured programs at TISS, SCMHRD, and corporate cohorts.Through Klaymatrix, I also take on fixed-scope data engineering, dashboard, and analytics projects — end to end.——If your company is running on spreadsheets, conflicting reports or a BI function that nobody fully trusts — let's talk. Experience

Klaymatrix
Founder
April 2017 - Present (9 years 7 months)
India

- Founded and scaled an analytics consulting firm serving clients in Finance, Healthcare, and Telecom.

- Deliver end-to-end data solutions: engineering pipelines, BI dashboards, advanced analytics, and decision-support systems.

-Lead technical pre-sales — including feasibility studies, solution architecture, effort estimates, and client proposals.

-Designed and delivered structured data science training programs; 10000+ professionals mentored to date.

-Active parallel venture — continues alongside fractional and advisory engagements.

PPN SOLUTIONS
Head of Data Analytics
September 2023 - May 2026 (2 years 9 months)

- Managing the overall Data Analytics functions, requirement gathering, POC, Project Management, Data visualization, architecture designing etc

-Embedded as fractional analytics head — owning the full data function from requirements to delivery.

-Designed data architecture and BI infrastructure; led POC and project scoping for new analytics initiatives.

-Managed cross-functional stakeholders and translated business needs into technical deliverables.

Tata Institute of Social Sciences
Datascience Trainer
March 2018 - May 2025 (7 years 3 months)
Mumbai, Maharashtra, India

-Delivered data science curriculum covering Python, ML, statistical modelling, and analytics tools.

-Trained postgraduate students across multiple cohorts; consistently high engagement and outcomes.

-Part of formative team, advising on course content and other strategic inputs

Cynoteck Technology Solutions

Head of Data Science
May 2023 - March 2024 (11 months)
India

Led the data science function — team building, project oversight, and delivery governance.

Symbiosis Centre For Management and Human Resource Development
